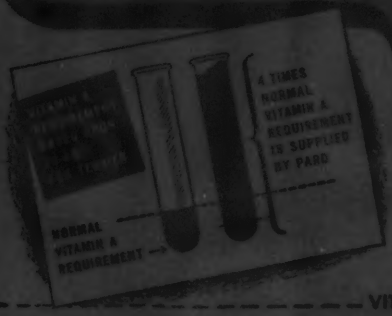
Actual tests show Pard supplies many times the Vitamin A requirements for dogs and optimum Vitamin D



The chart on the left shows the amount of Vitamin A required to maintain optimum dog health in a 20-lb. Wire-Haired Fox Terrier. It demonstrates the abundancy of A in Pard, which also contains the Vitamin D in required proportions.

VITAMIN A CONTENT OF PARD

Based on the requirements of a 20-lb. Wire-Haired Fox Terrier.
VITAMIN A—Pard supplied up to 4 times the normal requirement.
VITAMIN D—Pard supplied this important vitamin in optimum amounts.

Vitamin A is essential in the diet for normal vitality of epithelial cells and also aids greatly in maintaining resistance to infections. It is also of value in the maintenance of normal eye functions.

Vitamin D plays an important part in helping to regulate metabolism of calcium and phosphorus for use in building and maintaining bone and tooth structure. Also essential for normal growth.
